Installation Step

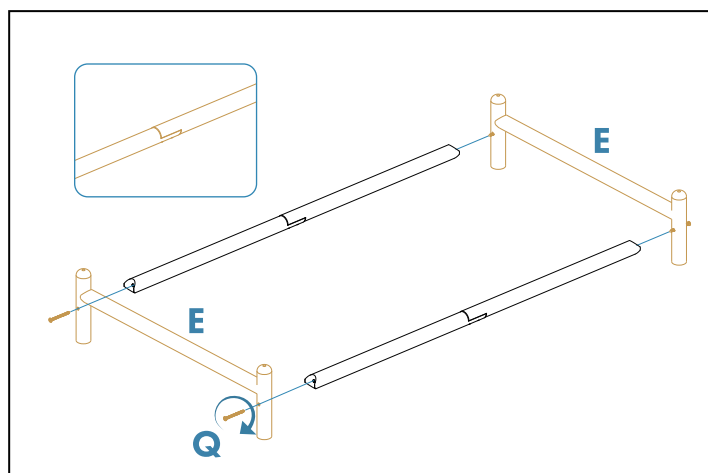

- 01** Using four **Screws (R)** to install two **Horizontal Edge Rails (F & G)**, then tighten with **Large Allen Wrench (V)**.

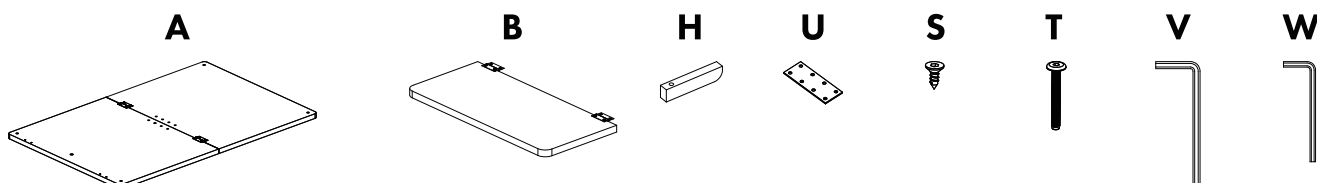

- 02** Using four **Screws (Q)** to install two **Vertical Edge Rails (E)** and the assembled Step 1, then tighten with **Large Allen Wrench (V)**.

Note: The screw hole of Horizontal Edge Rail faces downward as shown.

- 03** Install Panel and Hinge Panel

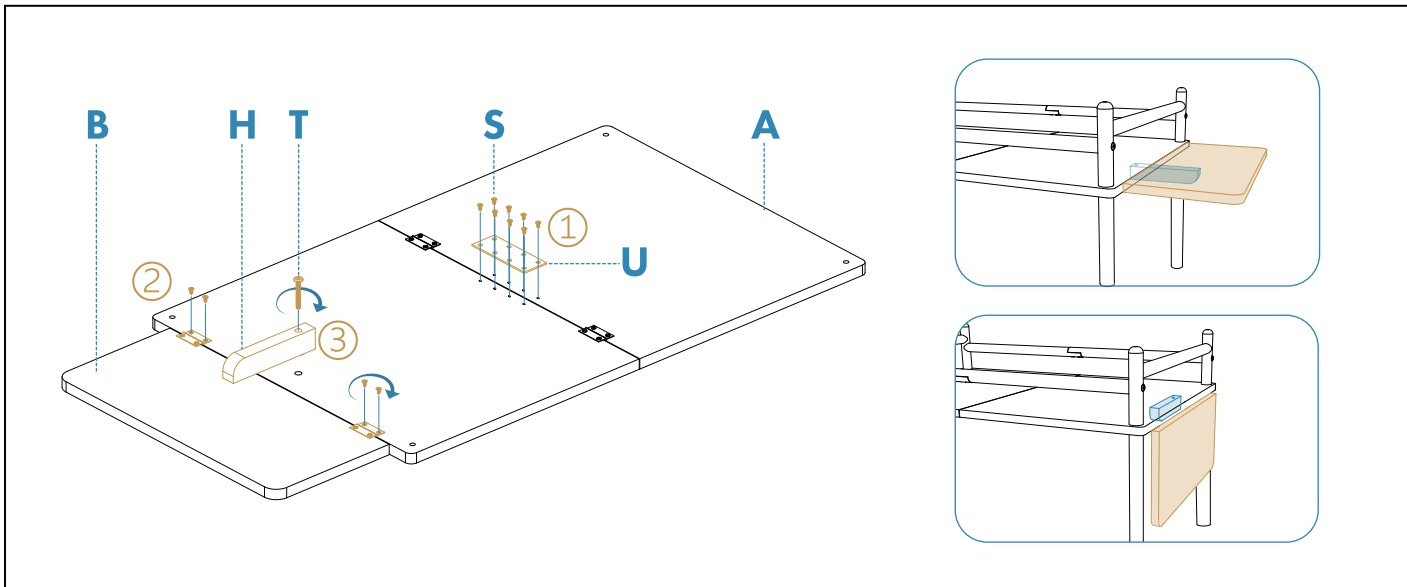

- ① Unfolding **Hinge Panel (A)** and use eight **Screws (S)** to install **Connection Piece (U)** as shown.
- ② Then use four **Screws (S)** to secure **Panel (B)** with **Hinge Panel (A)**.

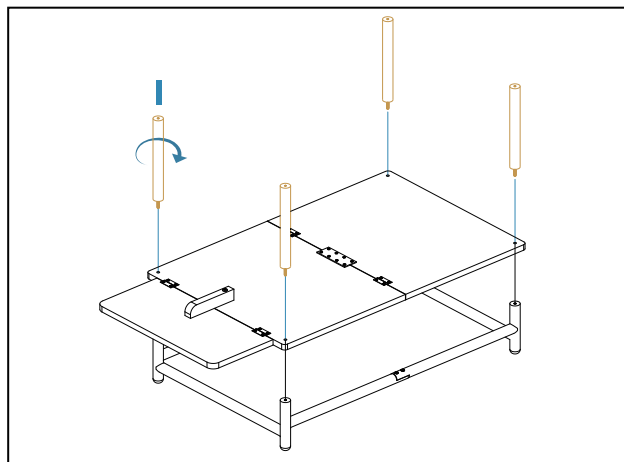

Note: Using **Small Allen Wrench (W)**.

- ③ Using **Screw (T)** to secure **Retaining Strip (H)** with the **Hinge Panel (A)**.

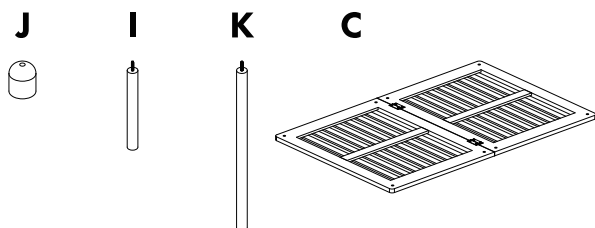

Note: Using **Large Allen Wrench (V)**; Adjust **screw (T)** as needed to ensure that the **Panel(B)** doesn't sag and operate smoothly.

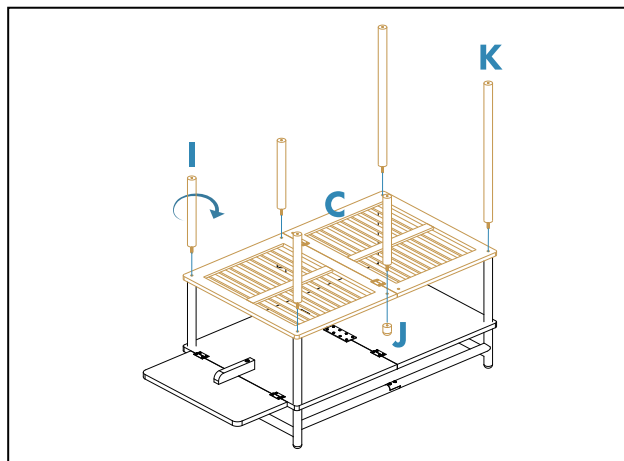

04 | Connect the assembled Step 2 and Step 3 as shown by twisting four **Short Rods (I)**.

05 Install Hinge Layer Board (C) as shown by twisting four **Short Rods (I)** and two **Long Rods (K)**. Secure the middle of **Hinge Layer Board (C)** by rotating two **Caps (J)**.

Note: All Short Rods (I) are installed on the same side.

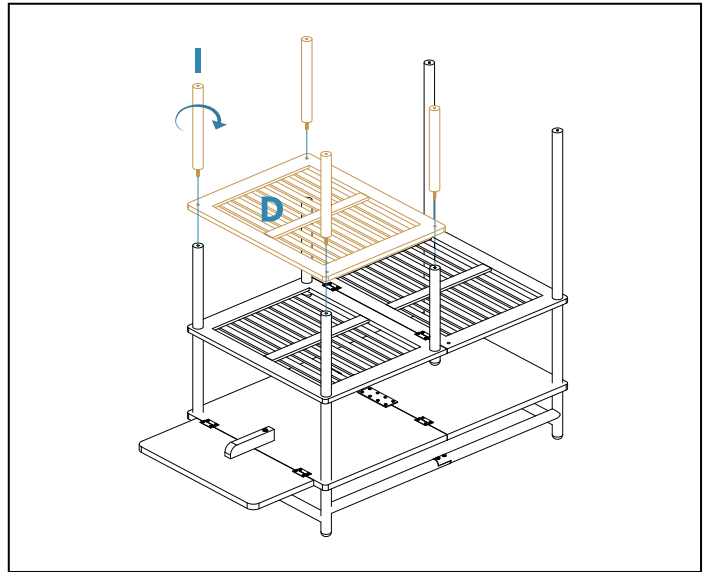

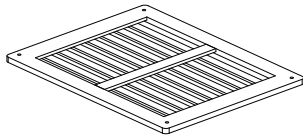

06

Install **Layer Board (D)** into position as shown by twisting four **Short Rods (I)**.

Note: The **Short Rod (I)** is adjustable in height for balance.

09

Store needed items to better assist you in taking care of your baby.

**10**

The diaper cabinet can be used as a storage cabinet after removing two **Horizontal Edge Rails (F & G)**.

Attention:

- Please ensure the diaper cabinet is installed in place.
- Please regularly clean it to prevent bacterial growth (1-2 times a week).
- Please keep replacement diapers separate from dirty diapers to store. The fabric drawer can be washed directly.
- Store items in different zones for neater organization.
- Adult supervision is required; Avoid leaving children unattended on the surface.
